

## Overview

The OrcaVue Life brings the cinematic bullet-time effect into the hands of consumers and professionals alike. This is the most affordable, light-weight, and compact of the OrcaVue models. Perfect for product videography, weddings, private events, and traveling photographers.

## Highlighted Features

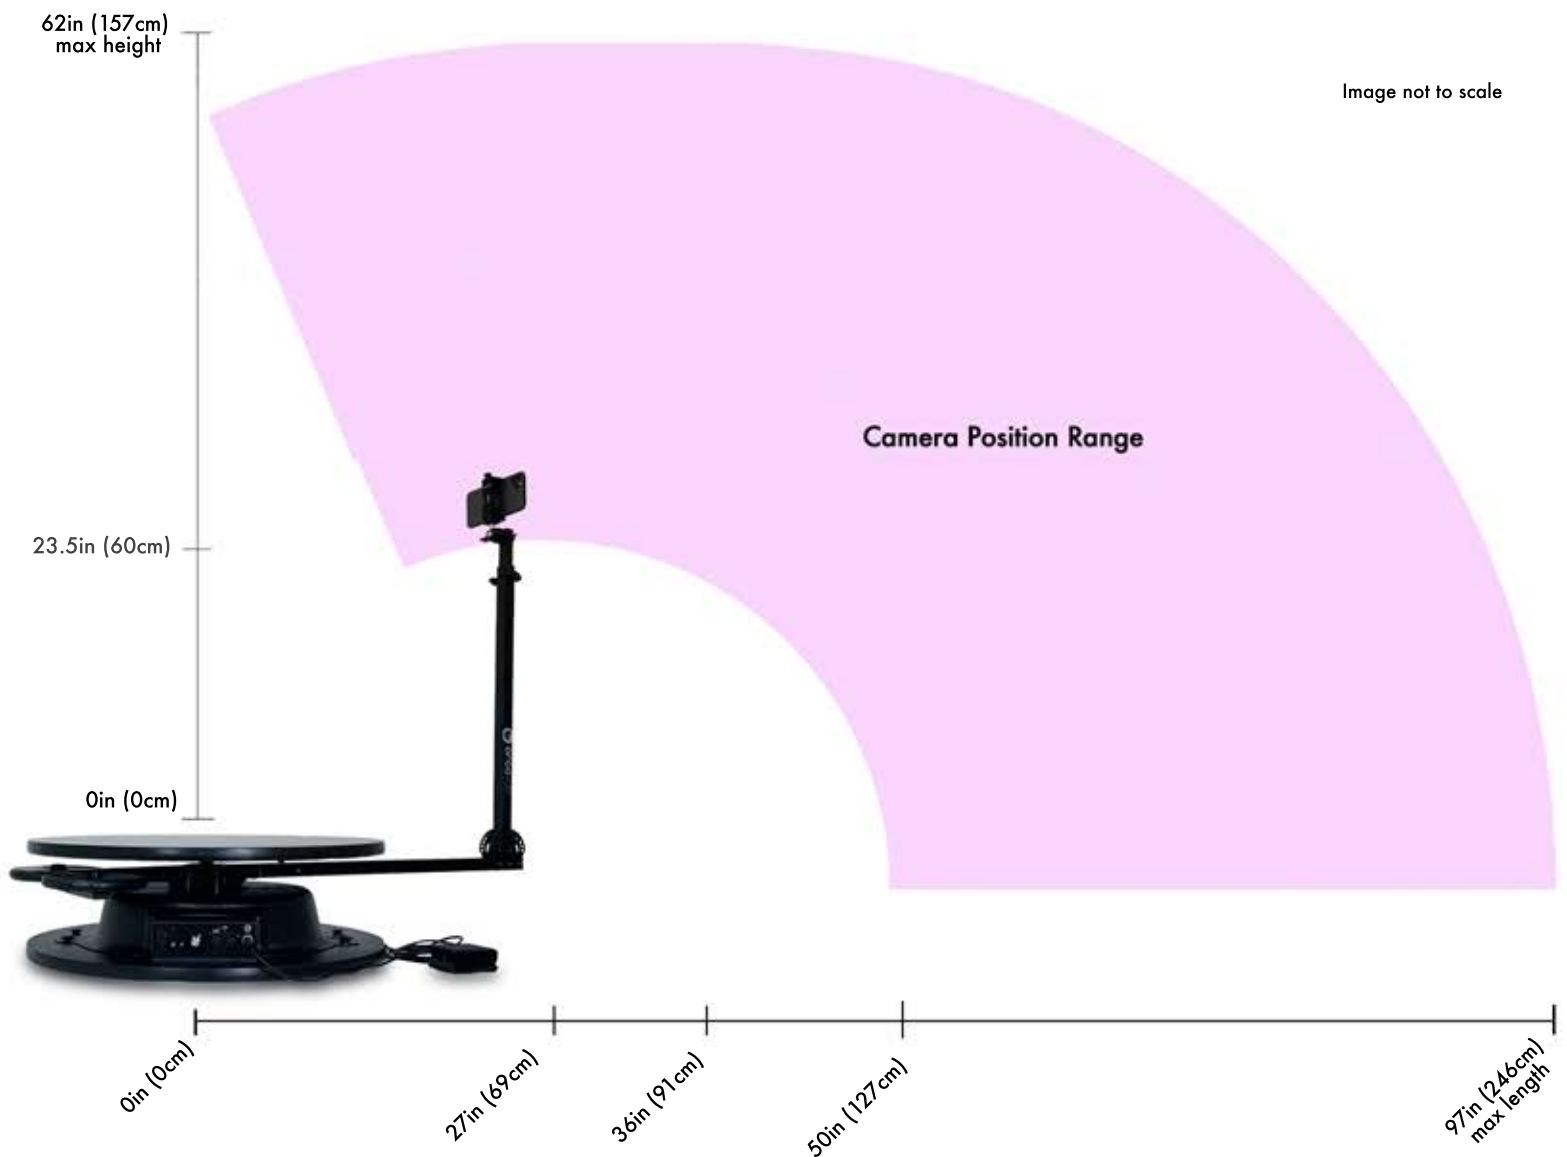

**Travel** - Conveniently packaged in an airline compatible wheeled transport case.

**Setup** - User friendly and tool-less design requires just minutes to setup.

**Flexibility** - Adjustable footprint can easily fit in the tightest event space, or extend out to capture those full body shots.

- Platform Height : 7.5" (19cm)
- Footprint Range : 4' to 15' (122-457cm)
- Camera Weight : 4 lbs (1.8kg)\*
- Max Occupancy : 1-2 People
- Rotation Speed : 15 - 100 RPM
- Unit Weight : 46 lbs (21kg)
- Shipping Weight : 92 lbs (42kg)
- Power Source : US Standard, 120-240VAC
- Battery Life : (Optional) 4 hrs Avg
- Foot Switch Length : 11' (3.3m)
- Stabilization Tech : None / In-Camera\*\*

\* Be very cautious when adding heavier cameras, as these cameras may not be supported at high speeds and/or full arm extension. The OrcaVue Life is designed to handle light duty cameras (ie iPad, Smartphone, GoPro). Before mounting other cameras, test all scenarios at your desired rotation speed and position with a 'dummy camera' weight and a subject on the platform.

\*\*The OrcaVue Life does not have built-in stabilization technology. Movement on the platform may affect stability of the camera. Many cameras, like iPhone, iPad Pro, & GoPro, have built in stabilization that digitally stabilizes video.
