## Specs

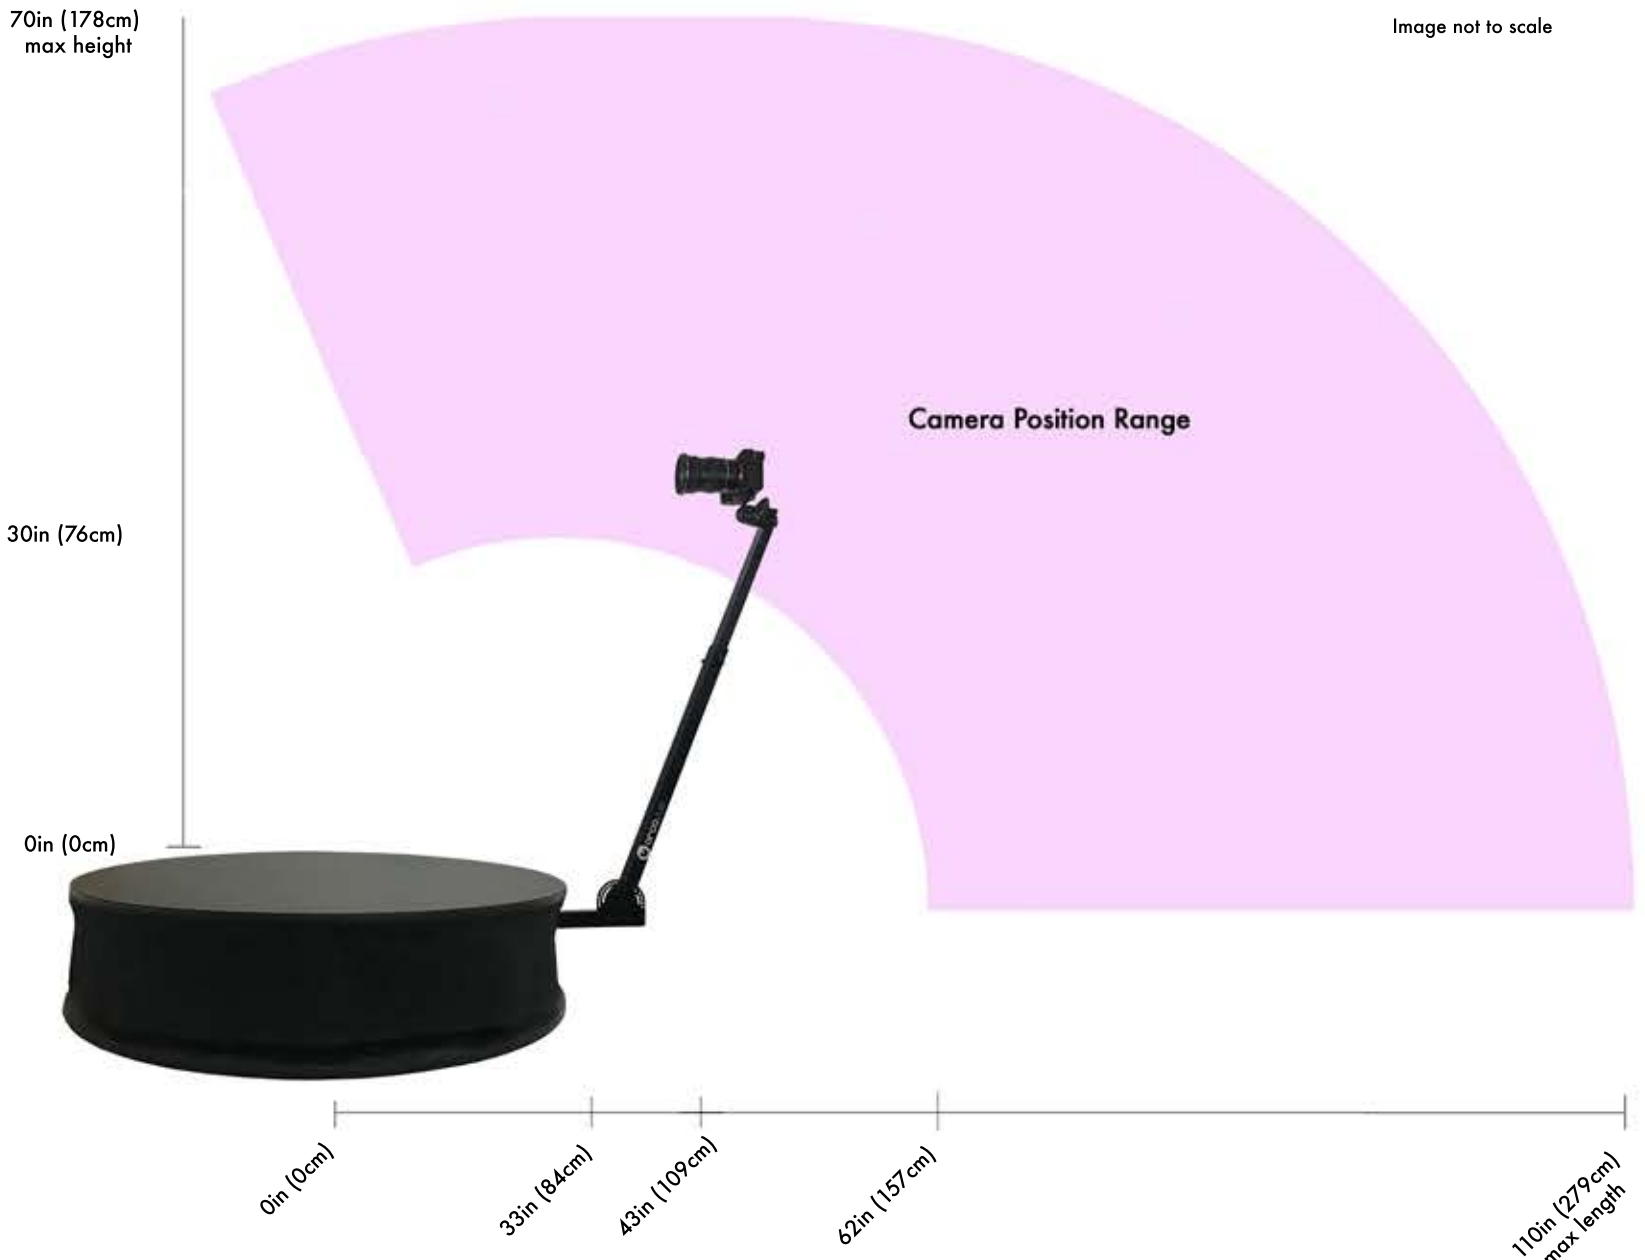

Platform Diameter : 46.5" (1.18m)  
Platform Height : 10" (25cm)  
Footprint Range : 6' to 18' (167-548cm)  
Camera Weight : 10 lbs (4.5kg)\*  
Max Occupancy : 4-5 People  
Rotation Speed : 10 - 50 RPM  
Unit Weight : 160 lbs (72kg)  
Shipping Weight : 320 lbs (145kg)  
Power Source : US Standard, 120-240VAC  
Battery Life : (Optional) 4 hrs Avg  
Foot Switch Length : 11' (3.3m)  
Stabilization Tech : Decoupled Stabilization

## Highlighted Features

**Stabilization** - With its zero-shake camera stability technology, any heavy activity on the platform by the user will not effect the camera's motion, resulting in a smooth seamless shot every time.

**Camera Compatibility** - A reinforced camera arm allows for DSLRs or professional cameras to be mounted. Extra mounting holes also allow for accessories such as ring lights to be mounted to the arm.

**Space** - The 4ft platform allows for group shots and a more dynamic and fluid movement of the center piece.

\* Be very cautious when adding heavy cameras or additional accessories to the camera arm, as it may not be supported at high speeds and/or full arm extension. The OrcaVue XL is designed for larger cameras, however certain combinations of counterweight, camera weight, rotation speed and positioning may not be supported. Before mounting other cameras, test all scenarios at your desired rotation speed and position with a "dummy camera" weight and a subject on the platform.
